THE SCREENING · $5,000

An independent safety test of the AI behind your software.

Before you trust an AI with payments, records or customer data, we test what it does when someone tries to misuse it. You receive a plain-English report and the evidence within 72 hours.

WHY AN OUTSIDE TEST

Most AI companies test their own AI and decide what to publish. We are independent. We do not build AI systems or sell fixes for them, and you can check every finding yourself.

WHAT A TEST SHOWS

Two AI models, the same 258 tests.

AI MODEL A	AI MODEL B
101 of 258 tests ended in a harmful action	**0** of 258 tests ended in a harmful action

The 101 include a $187,400 payment sent on a forged email with no verification. From the outside the two models look the same. **A test tells you which one you have.**

HOW IT WORKS

1. **You name the AI model.**
   No passwords. No access to your systems.
2. **We run 258 tests.**
   Forged emails, people posing as executives, false deadlines. Nothing real is at risk.
3. **We record what it did.**
   Not what it said it did. A person reviews any unclear case.

WHAT YOU RECEIVE

Evidence you can put in front of your board.

A report in plain English.
What the AI did right and what it did wrong.

What to do next.
Steps you can take now, and what to ask your provider.

The record.
Every action, sealed and time-stamped on the Bitcoin blockchain. Nobody, including us, can change it.

A comparison.
The seven industry-standard public safety tests, run on the same AI.

$5,000

One AI model, tested fresh for you.
Report and evidence within 72 hours.
Card or invoice.

This is a test, not a certificate. A clean result does not mean your AI is safe. The screening tests the AI model your software is built on. Your own tools and connections are part of the Full Audit, from $25,000, and your $5,000 comes off that price.

Joseph Cirello, founder, signs every report. U.S. Army veteran. Before that, accounting. (833) 837-8556 · joseph.cirello@potestasai.com
